

Change details panel visibility

URL: <https://docs.grassfish.com/docs/configure-details-panel>

Archiviert am: 2025-07-17 18:31:57

Starting with version 12.0, the details panel, which displays location and media details, is always visible by default. However, you can change the configuration so that the dashboard is hidden and requires manual unlocking.opening

To do so, perform the following steps:

1. Navigate to the configuration files on the server at: GVServer2\www\gv2\gf\GFWebHtmlCustomer\
2. Open one of the following folders:
 - **00000**: edit configurations for the entire server, which means for all customers.
 - **000xxx**: edit customer-specific settings. xxx is the customer ID.
3. Open the config.json file in your folder with a text editor like Notepad++.
4. Set **showSpotAndMediaDetailView** to **false**.
5. Save your changes and close the file.

```
"cms": {  
  "showSpotAndMediaDetailView": false  
}
```
