Archiviert am: 2025-07-17 18:42:30

You can enable time zones and set a default time zone for IXM One.

To do so, perform the following steps:

1. Navigate to the configuration files on the server at: GVServer2\www\gv2\gf\GFWebHtmlCustomer\
2. Open one of the following folders:
 - **00000**: edit configurations for the entire server, which means for all customers.
 - **000xxx**: edit customer-specific settings. xxx is the customer ID.
3. Open the config.json file in your folder with a text editor like Notepad++.
4. Set **defaultTimeZone** to your desired time zone. For example, enter **"Europe/Vienna"** or **"America/New_York"**.
5. Set **enableTimeZones** to **true**.
6. Save your changes and close the file.

```
"common": {  
  "defaultTimeZone": "Europe/Vienna",  
  "enableTimeZones": true  
}
```
