

HTML Composer doesn't load fonts

URL: <https://docs.grassfish.com/docs/load-fonts-in-html-composer>

Archiviert am: 2025-07-17 18:30:32

Symptoms

You get an error message when you try to load fonts in the HTML Composer.

Resolution

The following steps can help you identify and solve the issue:

- Ensure that the URL you called matches the MainServerURL in the master.config file.
- Ensure that you are using HTTPS or HTTP correctly as specified in the MainServerURL.

```
<configuration>
  <appSettings type="global">
    <add key="MainServerPath" value="\\gf-01\GVServer2\"/>
    <add key="MainServerURL" value="https://grassfish.com/gf"/>
  </appSettings>
</configuration>
```
