**Archiviert am:** 2025-07-17 18:42:20

---

This article describes how to enable or disable the F key functions of physical keyboards. This affects the overlays F2, F3, F8, and the F10 and F12 functions.

## System requirements

---

Ensure that you meet the following system requirements:

- Android Player version 11.8.9-coba or 11.8.7
- Server version 11.8.x or later
- Android Player configurations updated on server and IXM One

## Disable F keys

---

By default, F key functions are enabled in the player settings and in IXM One configuration group. You can, however, disable them.

## Configure the player

To disable the F key functions in the player settings, perform the following steps:

1. On your device, go to **Common**.
2. Disable the setting **Enable F-Key Functions**.

Common

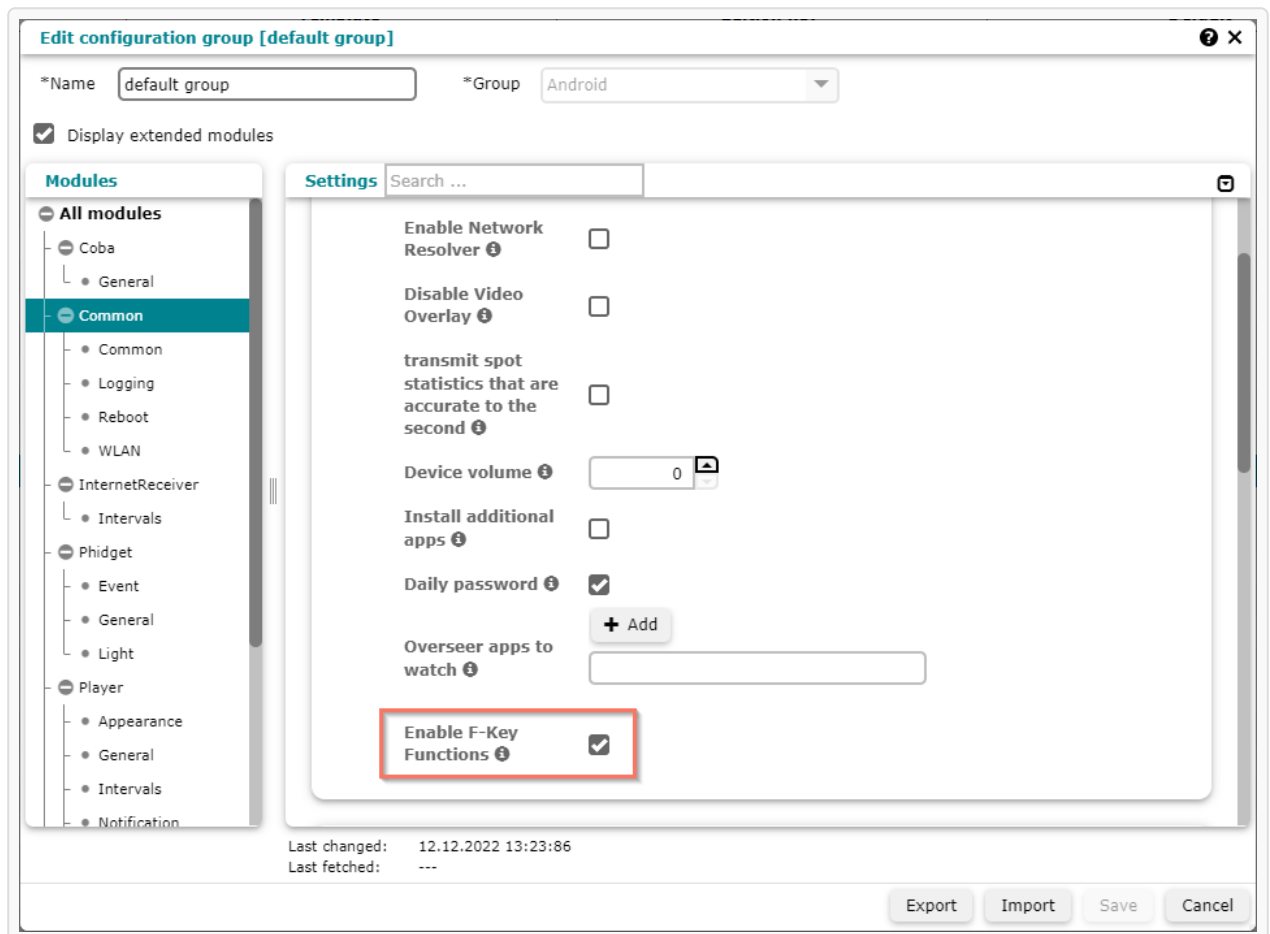

<b>Advanced spot statistics</b> Activate/deactivate detailed spot statistics	<input type="checkbox"/>
<b>Install additional apps</b> Install additional apps with the updates	<input type="checkbox"/>
<b>Daily password</b> Enable or disable the daily password	<input type="checkbox"/>
<b>Overseer apps</b>	
<b>HDMI Cycle Activated</b> Turns HDMI off and on again at the start of the Player	<input type="checkbox"/>
<b>Enable Network Resolver</b> Enable network resolver for this player	<input checked="" type="checkbox"/>
<b>Disable Video Overlay</b> Disable playing videos in an overlay	<input checked="" type="checkbox"/>
<b>Enable F-Key Functions</b> Enable the keyboard F-Key functions (f2, f3, f8, f10, f12)	<input checked="" type="checkbox"/>

Logging

## Configure theIXM One

To disable the F key functions in IXM One, perform the following steps:

1. In IXM One, go to **Administration > Player**.
2. Select the **Configuration groups** tab.
3. In the **Configuration groups** pane, double-click on the configuration group. Alternatively, select the configuration group and click on **Edit**.
4. In the **Modules** pane, select **Common**.
5. Disable the setting **Enable F-Key Functions**.

6. Click **Save** to save you changes.

The settings are synchronized between the player and IXM One.
