**Archiviert am:** 2025-07-17 18:39:50

---

To enable DOOH in the IXM One configuration file, perform the following steps:

1. Navigate to the configuration files on the server at: GVServer2\www\gv2\gf\GFWebHtmlCustomer\
2. Open one of the following folders:
  - **00000**: edit configurations for the entire server, which means for all customers.
  - **000xxx**: edit customer-specific settings. xxx is the customer ID.
3. Open the config.json file in your folder with a text editor like Notepad++.
4. Change the settings as follows:
  - Set **enableDooh** to **DOOHPlatform** or **DOOHLite**. This depends on which DOOH version you're going to use.
  - Set **enableCategoriesPerScreen** to **true**.
  - Set **enableLiveTags** to **true**.
  - Set **enableSpotPropertyInheritanceForUserType** to **Admin**.
5. Save your changes and close the config file.

```
"enableDooh": "DOOHPlatform",  
"enableCategoriesPerScreen": true,  
"enableLiveTags": true,  
"enableSpotPropertyInheritanceForUserType":  
[  
  "Admin"  
]
```

## Note

For more information, see our [DOOH installation guide](#).
